

HospiTrack Quick Start Guide

 Get HospiTrack live in 5 minutes!

Prerequisites

- GitHub account
 - Render account (free): <https://render.com/signup>
-

Step 1: Push Code to GitHub (2 minutes)

```
cd /home/ubuntu/hospitracker

# Option A: Using GitHub CLI
gh auth login
git push origin main

# Option B: Using Personal Access Token
# Create token at: https://github.com/settings/tokens
git push origin main
# Enter username and token when prompted
```

Verify: Check <https://github.com/JZembower/HospiTrack/commits/main>

Step 2: Deploy to Render (3 minutes)

One-Click Deploy:

1. Visit: <https://render.com/deploy?repo=https://github.com/JZembower/HospiTrack>
2. Click "Connect GitHub"
3. Choose service name: `hospitracker`
4. Click "Create Web Service"
5. Wait 5-10 minutes for build to complete

Your URL:

```
https://hospitracker-XXXX.onrender.com
```

(XXXX will be auto-generated by Render)

Step 3: Verify Deployment (1 minute)

Open your Render URL and test:

- ✓ **Landing Page** - Should display hero section with 3 feature cards
 - ✓ **Find Care** - Search “San Francisco, CA” for chest pain
 - ✓ **Explore** - Should show 4,088 hospitals on map
 - ✓ **Demo** - Submit triage form with ML mode ON
 - ✓ **API Docs** - Visit `/docs` for interactive API
-

Done! 🎉

Your HospiTrack is now live and publicly accessible.

Key Features:

- 🔍 Find emergency care by symptoms and location
 - 🗺️ Interactive map of 4,088 US hospitals
 - 🤖 ML-powered triage recommendations
 - 📊 Quality scores, wait times, and mortality rates
-

Troubleshooting

Build fails?

- Check Render logs in dashboard
- Verify `Dockerfile.prod` is in repository

Health check fails?

- Wait 2-3 minutes for initial startup
- Check logs for Python errors

“No hospitals found”?

- Increase radius to 100 km
- Try coordinates: lat=37.7749, lon=-122.4194

Need help?

- Read full guide: `ACTUAL_DEPLOYMENT_STEPS.md`
 - Contact: Render support at <https://render.com/support>
-

Optional Enhancements

Custom Domain

1. Render Dashboard → Custom Domains
2. Add your domain (e.g., `hospitracker.com`)
3. Update DNS CNAME to Render URL

Upgrade to Paid Plan (\$7/month)

- No cold starts (always-on)
- Better performance
- Custom domains

Monitor Performance

- Render Dashboard → Metrics
- Set up alerts for health check failures

Questions? Check the detailed guide at `ACTUAL_DEPLOYMENT_STEPS.md`
